Personal Profile

MSc Computer Science candidate with hands-on experience in scalable backend systems, cloud technologies, and AI. Proven record of delivering impact through full-stack development and innovative automation projects. Passionate about applied machine learning and agile teamwork.

Education

University College Dublin

MSc in Computer Science (Sept 2024 – Sept 2025)

Coursework: Distributed Systems, Cloud Computing, Big Data, Machine Learning with Python, Advanced Data Structures in Java, Generative AI, Advanced SQL, Advanced Machine Learning.

Sri Ramakrishna Institute of Technology

BE in Computer Science and Engineering (Aug 2020 – Aug 2024)

Coursework: C, C++, Object-Oriented Programming (Java), Python, Web Development, Artificial Intelligence, Operating Systems, Computer Networks

Projects

Finance Assistant (React, FastAPI, Hugging Face AI, Yahoo Finance API)

- Built an intelligent financial assistant using Hugging Face transformers (FinBERT, RoBERTa) with real-time market data integration via Yahoo Finance API.
- Implemented AI-powered intent classification and sentiment analysis for natural language financial queries, replacing traditional rule-based systems with machine learning automation.
- Developed comprehensive technical analysis features including RSI calculations, moving averages, and Fortune 500 company intelligence with React frontend and FastAPI backend.

AI Powered CLI Agent (Python, OpenAI API, MCP, Rich Console)

- Built an intelligent cross-platform system management tool using natural language processing to automate software operations.
- Integrated OpenAI GPT-4o-mini-API with custom LLM parser to convert user commands into structured JSON responses for system operations.
- Implemented Model Context Protocol (MCP) with JSON-RPC over HTTP for reliable client-server communication and task dispatching.
- Developed platform-specific handlers for Linux, macOS, and Windows with automated package management through Homebrew, APT and Winget.

Agri-bridge (React, Vite, Spring Boot, JWT, MySQL)

- Developed a full-stack eCommerce application bridging farmers and sellers for agricultural waste products.
- Designed responsive UI components using React and custom CSS for enhanced user experience.
- Implemented backend features including authentication with JWT, product management, and robust API endpoints.
- Built comprehensive order management system with shopping cart functionality and real-time product search/filtering.

Skills

- Programming:** Python, Java, JavaScript | **Databases & DevOps:** MySQL, MongoDB, Docker, Kubernetes
- Machine Learning & Data Science:** Supervised/Unsupervised Learning, Model Evaluation
- Tools:** Git, RabbitMQ, Linux, Bash
- Soft Skills:** Effective communication, Collaborative teamwork, Adaptability, Problem-solving, Time management

Professional experience

Solar Secure Solution |Frontend Developer - Intern

Aug 2022 – Oct 2022

- Developed responsive UIs using HTML5, CSS3, and JavaScript, boosting user engagement by 20%.
- Leveraged React component architecture to reduce code complexity by 30% and accelerate feature development.
- Implemented reusable UI components, improving maintainability and cutting page load times by 15%

Achievements and Leadership Qualities

ISTEINDIA, Galgotias University, Noida

Awarded *"The Best Acceleration and Innovation"* 1st Place at the 6th India Karting Event for developing a real-time go-kart distance display system, enhancing race performance tracking and driver analytics. Engineered the system using Python, Arduino, and ultrasonic sensors to detect karts ahead, enabling adaptive speed adjustments for improved safety and efficiency.

Volunteered in organizing District level hackathon, Coimbatore

Spearheaded a 750+ participant hackathon, managing logistics, budgeting, and team coordination to deliver a seamless event. Streamlined participant engagement and certification processes, achieving 95% attendee satisfaction.
